

Supplemental Figure 3: Evolutionary

relationship of the *Neisseria* isolates

based on *f_rplF*

Neighor Joining Tree representing the

phylogeny based on the different *f_rplF*

alleles.

The colors correspond to the species

studied; *Nm* (red), *Nl* (yellow),

Np (purple), *Nb* (blue) and *Ns* (orange).

The circles correspond to the isolates

described by Bennett et al (2014)

and the squares the isolate of the

present study.
